**Tem Tech MI-24
CNC Template Maker**

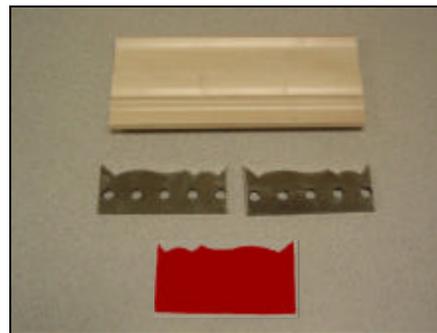

With the three axis router and easy to use software, creating your own templates has become much easier, and is less expensive than ever before, when you use the MI-24 CNC Template Maker from Tem Tech.

Your template choices are endless. Scan a design using the Cannon scanner which is included in our full package, or draw your own design using our template profile draw software.

The crown molding piece shown below was cut with a template created on the MI-24 CNC Template Maker.
